

Write short Notes on:

1. Criteria for judging causality.
2. Investigation of an epidemic of hepatitis A.
3. Strategies being followed for a polio-free India.
4. Janani suraksha yojna (JSY)
5. Management of moderately malnourished child.
6. Infant mortality: causes and its prevention.
7. Delivery of essential obstetric care to community.
8. National health programmes related to nutrition.
9. Missing girl child in India: causes and prevention.
10. Integrated child development services (ICDS)

Write short Notes on:

1. Enumerate health problems of school children; discuss delivery of school health services.
2. Mortality indicators of maternal & child health care.
3. Monitoring of growth in under fives at anganwadi centre.
4. Post natal care : need and its delivery
5. Genetic counseling
6. Delivery of emergency obstetric care to rural population.
7. Accredited social health activist.
8. Pre-natal diagnostic technique (PNDT) act.
9. Prevention & control of neonatal tetanus in rural India.
10. Management methods & techniques used in health system

Write short Notes on:

1. Indian public health standard for primary health centers.
2. Emergency contraceptive pill
3. Adverse health impact of climate change
4. LOT quality assurance sampling
5. International health regulations 2005
6. Geographical information system (GIS) in health management.
7. Human development index(HDI)
8. Extensively drug resistant T.B. and its control
9. Needs of people living with AIDS.
10. Non-parametric tests of statistical significance.

Write short Notes on:

1. Discuss strategies for behavior change communication for prevention of cardiovascular diseases.
2. Describe briefly integrated disease surveillance project.
3. Discuss disaster management preparedness at community level.
4. Microbiological indicators of drinking water quality.
5. Discuss role of tele medicine in public health.
6. Describe Techniques used for inventory control
7. Describe methods of disposal of health care waste.
8. Discuss food borne intoxications & their control at community level
9. Epidemiological triad & levels of preventions.
10. Family cycle and its role in stress.

Write short notes on:

1. Case-Control study design
2. Avian influenza in India
3. HDCS Antirabies Vaccine
4. Epidemiology of Japanese encephalitis in India
5. Staphylococcal food poisoning
6. Health hazards of global warming
7. Cancers and its global variations
8. Multi-Drug-Resistance Tuberculosis
9. Role of social factors in disease causation
10. Childhood obesity in India

Write short notes on:

1. Bhore committee
2. Tenth five year plan : health issues
3. Elements of evaluation
4. Networks analysis
5. Approaches to health education
6. UNICEF (U.N. children's fund)
7. Public health laws in India
8. Community based health insurance in India
9. Planning cycle : application to health problem
10. Involvement of private practitioners in implementation of national health programs

Write short notes on:

1. Discuss the current scenario of sexually transmitted infections in Indian context
2. Outline the strategies for strengthening counseling services at integrated counseling and testing centre
3. Discuss the implications of social factors on infant mortality
4. Outline role of pedagogical techniques in relation to IMNCI
5. Discuss the role mathematical models on epidemic of HIV/AIDS
6. Discuss various techniques of Economic analysis
7. Discuss GANTT chart with suitable examples
8. Outline salient features of national health policy 2002
9. Discuss the role of evidence based medicine in assessing vaccine efficiency
10. Linear programming

Write short notes on:

1. Qualitative research
2. Health economics
3. Medical geography
4. Epidemiology of Hepatitis B
5. Evolution of community medicine
6. Prevention & control of nutritional anemia in children
7. Health system monitoring
8. Integrated diseases surveillance project
9. Vaccine research against HIV
10. Role of ICD-10 health management

Write short notes on:

1. WHO 3/5 initiative for Anti Retroviral Therapy in HIV /AIDS.
2. Qualitative techniques for data collection on reproductive tract infections.
3. Implications of DOTS on Epidemiology of tuberculosis in India.
4. Strategies for prevention and control of Bird Flu.
5. Status of emerging and re-emerging infectious disease.
6. Public Health response to Biological Warfare.
7. Cluster Sampling.
8. Combating Stigma and discrimination in leprosy.
9. Newer vaccines for consideration for inclusion in immunization programme.
10. Pre Exposure Prophylaxis against rabies.

Write short notes on:

1. Role of Intensified Pulse Polio Immunization in polio eradication.
2. Approaches and strategies of malaria control.
3. Control of anaemia in pregnant women.
4. Balanced Diet for a 4 year old child.
5. Counselling of wife with HIV positive husband.
6. Management of adverse sex ratio in India.
7. Non scalpel vasectomy.
8. Responsibilities of School Health Officer.
9. Radiation Hazards.
10. Public Health aspects of Disaster Management.

Write short notes on:

1. Baby friendly hospital initiative.
2. Integrated disease surveillance project.
3. Verbal Autopsy in SRS.
4. Immunization Service Delivery Supportive Supervision.
5. AYUSH in NRHM.
6. Screening for health related quality of life.
7. Evidence based research in epidemiology.
8. Assessment of geriatric patient.
9. Emporiatics.
10. Women empowerment and health.

Write short notes on:

1. Indian Public Health Standards in relation to Community Health Centres.
2. Planning of resources for achieving 100% immunization coverage in CHC area.
3. Management of adverse vaccine reactions in the field.
4. Status of neonatal deaths in India and role of community to reduce it to achieve MDG goal.
5. Surveillance of environmental factors and its role in reduction of morbidities.
6. Validity of anthropometric indications in relation to assessment of nutritional status.
7. Comment on the role of injectable Polio vaccines in eradication of Polio myelins.
8. Dengue outbreaks in 2006 in India.
9. Evaluation of RCH programme in CHC area.
10. Genetic Counselling.
