Write short notes on:

1. a) Draw a diagram of transverse section of skin.  
   b) Blood supply of skin.  

2. a) Define flap.  
   b) Classification of flaps.  

3. a) What is planning in reverse?  
   b) Procedure of planning in reverse.  

4. a) What is an implant?  
   b) How will you classify implant?  
   c) Clinical applications of implants.  

5. a) What is cephalometry?  
   b) How it is helpful in Plastic Surgery?  
   c) Clinical conditions where cephalometry is helpful in management.  

6. a) Embryology of external ear.  
   b) Classify the congenital anomalies of external ear and describe their developmental basis.  

7. a) Classification of burn wound based on depth of involvement.  
   b) Clinical features of burn wounds of different depth.  

8. a) Classification of peripheral nerve injury.  
   b) Different electrodiagnostic tests used for nerve injury.  

9. a) What is informed consent?  
   b) Why it is important for Plastic Surgeons?  

10. a) Favorable and unfavorable fractures of mandible.  
    b) Angle’s classification of malocclusion.
