

# National Board of Examinations

**Question Paper Name :** DNB Ophthalmology Paper2  
**Subject Name :** DNB Ophthalmology Paper2  
**Duration :** 182  
**Total Marks :** 100  
**Display Marks:** No

**Maximum Instruction Time :** 0  
**Is Section Default? :** No

**Question Number : 1 Question Id : 32718744712 Consider As Subjective : Yes**

**Please write your answers in the answer booklet within the allotted pages as follows:-**

Question Number	Answer to be attempted within	Question Number	Answer to be attempted within
Q. 1	Page 1-5	Q. 6	Page 26-30
Q. 2	Page 6-10	Q. 7	Page 31-35
Q. 3	Page 11-15	Q. 8	Page 36-40
Q. 4	Page 16-20	Q. 9	Page 41-45
Q. 5	Page 21-25	Q. 10	Page 46-50

1. a) Etiopathogenesis and clinical presentation of sympathetic ophthalmitis. [5]
- b) Management of sympathetic ophthalmitis. [5]

**Question Number : 2 Question Id : 32718744713 Consider As Subjective : Yes**

- a) Clinical approach to a case of congenital epiphora in a one year old child. [5]
- b) Management of congenital dacryocystitis. [5]

**Question Number : 3 Question Id : 32718744714 Consider As Subjective : Yes**

- a) Clinically significant macular oedema. [5]
- b) Describe various visual field defects seen in primary open angle glaucoma. [5]

**Question Number : 4 Question Id : 32718744715 Consider As Subjective : Yes**

- a) A 2-year-old child presents to eye OPD with complaints of bilateral leucocoria. How would you proceed for its management? [5]
- b) Management of marginal keratitis. [5]

**Question Number : 5 Question Id : 32718744716 Consider As Subjective : Yes**

- a) Optics of 3 mirror gonioscopy and clinical implementations. [5]
- b) Management of intermediate uveitis. [5]

**Question Number : 6 Question Id : 32718744717 Consider As Subjective : Yes**

- a) One day following trabeculectomy surgery, a 55 year old patient presented with severe pain in the operated eye. On examination of the operated eye, anterior chamber was uniformly shallow with patent peripheral iridotomy and intraocular pressure was 50 mm Hg. What is the most likely diagnosis? Discuss principle of management. [2+3]
