Minister for Health & Family Welfare
and Chemicals & Fertilizers
Government of India

Message

The Ministry of Health and Family Welfare is committed to provide affordable quality health care to the citizen of the country. We need to have a dedicated and well-trained pool of doctors and specialists available within our country to achieve our goals.

National Board of Examinations in Medical Sciences (NBEMS), an autonomous body of Ministry of Health and Family Welfare, Government of India, is one such organisation which is working towards providing quality medical education to the young doctors of our country at an affordable cost.

NBEMS has utilized the infrastructure available in various private hospitals, Government medical colleges, district hospitals, Railway hospitals, ESIC hospitals to accredit them for Post Graduate and Post-Doctoral training.

The Examinations conducted by NBEMS, provide a uniform and common platform to our students for various entrance and exit examinations, maintaining high standards of examination. We are moving towards building a robust primary, secondary and tertiary health care delivery systems in the country. The recently launched Diploma Courses by NBEMS will provide trained specialists at the district and sub-district level. This will help us in improving the health care delivery at ground level and also in combating pandemic situations like Covid-19 pandemic.

The NBEMS has taken several initiatives to provide better opportunities for trainees within the country by launching new courses and increasing the PG seats without compromising the quality and standard of teaching and training. NBEMS has taken the standards and sanctity of medical examinations at a new pedestal.

I wish all the success to NBEMS in future endeavours.

(Dr. Mansukh Mandaviya)
